DATASET GUIDE

The [Exempt Organizations Business Master File Extract](#) has information about organizations that have received a determination of tax-exempt status from IRS. The Exempt Organizations Business Master File Extract provides information about organizations from the Internal Revenue Service's Business Master File. This is a cumulative file, and the data are the most recent information the IRS has for these organizations.

The information is available for downloading by state or region. The files are available in comma-separated value (CSV) format. The Exempt Organization Business Master File Extract [Information Sheet](#) explains the codes used in the data files.

The files are divided by states and regions:

- States and regions are determined from the filing address and represent the location of an organization's headquarters, which may or may not represent the state(s) in which an organization has operations.
- Records are sorted by Employer Identification Number (EIN).
- There is one file for each state and the District of Columbia, as well as Puerto Rico.
- There is one file for International (non-domestic) organizations.
